50X1-HUM

50X1-HUM SECRET 50X1-HUM Commenta The information confirms the Staleg I and II occupied 50X1-HUM as previously by the 91st Gds RL Regt. howitzer and field can units of the 1st Necz Div entered the installation on 1 July. These units, however, left Jueterbog for Doeberitz as early as 5 July. Compared with information of paragraph 2, it does not appear impossible that units of the 1st Mecz Div from East Berlin transferred to the Luckenwalde area for advanced combat practice firing as early as 1 July. Elements of these units may have been quartered in Staleg I and II and other elements in a tent camp southwest of Luckenwelde. No information has been received on a retransfer of these elements to Doeberitz prior to 18 July. The unknown Colonel Buchkov (fnu) observed in Stelag I possibly is the commanding officer of the 91st Gds AL Regt. 50X1-HUM Comment. These observations again confirm the transfer to East-Derlin of large elements of the 14th Gds Mecz Div on 17 June. The number of 300 tenks is, however, too high for a mechanized division.
